To create a child's account on Splex, you can follow these steps:

Adding a Child During Registration

In the registration form of your organization, log in to your account.
At the **Account** step, click on **Create a new child account**.
Enter your child's first name, last name, date of birth, and gender.
Click on **Submit**.
Select your child and then click **Next** to continue with the registration.

Adding a Child from Your Splex Account

Log in to your account on the Splex platform.
In the left menu, click on **Account Settings - Child Accounts**.
Click the blue **Add** button on the right.
Enter your child's first name, last name, date of birth, and gender.
Click on **Submit**.

Important Note: Adding your child to your account does not register them for any activities. To register your child, you must use the registration form link provided by your organization.

Make sure to check the date of birth you enter, as it is used to validate your child's age in registration forms. An error could prevent them from being placed in the correct group.

If you need further assistance, please refer to our documentation on how to register your child or yourself for an activity.
